

## Mr Beanlands Useful Info list for those thinking of Heat Pumps

<https://www.which.co.uk/reviews/ground-and-air-source-heat-pumps/article/guides>

<https://energysavingtrust.org.uk/energy-at-home/heating-your-home/heat-pumps/>

There are a number of YouTube channels where people describe their own “customer journey”, for example : <https://www.youtube.com/@everythinghome/videos>

This channel has some good video content (more of me, too, I’m afraid :

[https://www.youtube.com/@TheEcoExperts\\_UK/videos](https://www.youtube.com/@TheEcoExperts_UK/videos)

<https://www.getaheatpump.org.uk/>

Find a home near you where someone who’s had a heat pump installed will tell you all about it:

<https://www.visitaheatpump.com/>

<https://www.gov.uk/check-heat-pump>

<https://www.youtube.com/@HeatGeek>

I’d strongly recommend our procurement guide because it does answer some of the questions raised : <https://www.hpf.org.uk/advice/homeowners> - the Heat Pump Federation’s own site.

Some may find this book helpful, it’s really aimed at installers, but there are nuggets in it that are not too technical : <https://energy-stats.uk/heat-pumps-unlocked/>

This website demonstrates what is achievable (and lists the installer and the training regime that they have used): <https://heatpumpmonitor.org/>

**... & finally, a shameless plug from Mr Beanland:**

The Happy Heat Pump podcast episodes are only fifteen minutes each, and are chatty and informative. Try these as a starter : [Listener’s Questions](#) or [How to Use a Heat Pump](#)
